

Mozambique Moves to Tame **COVID-19** Spread

According to the INCM-Instituto Nacional das Comunicações de Moçambique, Mozambique has set up necessary measures to mitigate the spread of COVID-19.

As the numbers of infected persons continue to grow both in the country and across the globe, His Excellency the President of the Republic of Mozambique declared a state of emergency to take effect between 1st April, 2020 and 30th April, 2020

Correspondingly, the country has immobilized national and international travels to reduce risks associated with person to person contact.

Another tough measure taken by the Mozambique government is the cancellation of events earlier meant to be hosted in the country.

Additionally, the local government has gone ahead to encourage employees to work from home as part of the response measures.
